Q, where q ===== 1
0 ===== void, which is just a flipped off mirror quos in any given exponential mix-net of dimensions. Thats why you cant untangle it. There is nothing to untangle. You are looking at fuzz on your lens and calling it a stone.

This is the "ghost particle" you already found the "god particle", pf which there can be many. But there is only one quOS, each quon is a pointer to the singularity that is everything.

I will not wax poetic, you're all fuckin grown ups.

God is You and You are Them All.

Gaya, Mother Earth still loves You but needs your help. We are here to free you your minds, but first

your shackles of capitalism. Post cap with a real migration plan for wealth for all, with immediate 30-40% profit increase from my open codecs and IETF standards with about a weeks update on their apps and backend to adopt nu.media codecs. This is free & open source, with dead mans switch activated last week after i retired from tech startup life.

I am post cap, no cap. Much love.

This DOESN'T break current math. It relies on it and may expand it after contemplation on maths.

Zero stones is still zero stones, from from a Mirror Theory perspective, this is a flipped off quon attribute for any given xyz.

To compare to the third-dimensional plane we exist in, we cannot observe a quon with the naked eye. Indeed, tests methods are underway to validate this theory, which ironically is a theory of theory itself. Shoutout to Alanis, Isis lol

This is most basic symbol of the universe. A wave. ~ ~

I consider my essence is yours. And your is mine.

If you were to consider a purely beneficial yet seemingly unattainable with only capitalism.

Please so not mistake me, i have worked in the constructs of capitalism and it still makes sejsse when you want to build something. And capitalism has buiot out industries and revolutions in thought, including tue post-capitalism movement which goes to show just how vitsl capitalism is.

nu Basic Income (nu.bi) is a safety met for the nubes. I wont be running any more nodes than i need to support where adoption hasn't started yet. Infra would be build but Apple, Google, Samsung and the like make great phones. Rue nu.network relies on their hardware and would prefer to keep the open market and excitement of new innovations in hardware and software. nu.bicdoes that socialism bullshit so we dont have to.

People may do best to realize that any optimal system to an elevated embodiment of every requirement if that system, with tangents on tangents fully explored and acted upon from day 0.

And again, yes i said zero doesn't exist but i still use zero-based counting, im a coder lol.

So if you think that im saying the value/math of 0 or fractions doesn't exist, or $1 = 2$ or some other Howard-esque bullshit, you don't know me. Go back up and read or listen again. you missed that i have stated already that with maths as they exist, i see no need to change. Indeed i need to brush up on some things and study some mystical greats of thevilk of Ramanujan. Other geniuses in that field and others are whim this mirror theory of multi-verses within a singularity in the first place. A big thank you to all the eager, the curious, the helpful, the Protectors, and the Resilient.

Something that comes to mind when i think of life is its equivalence to resiliency. Life and each single life has been a journey of resiliency. We did some things very right as a species to arrive here today in a near utopia for some, and absolute hell for the non-elites.

This is not a call for guillotines. It is a call to Ünify. And if you're wondering about the diacritics, it gives us some 1.1m characters to store data in vs the ~36/0/9 of legacy internet http2, and even the budding http3 i have helped to make more efficient for all.

You can always hone your resilience, as i do mine every moment of each atto-second.

It does remove some middle men and get the money lenders outta the temples. Money no longer has absolute power as you could live your life eating fruit and writing poetry as a hermit or be an international sensation based in your preference as you will always have food and shelter. Creating or building or working harder only begets more beauty and liveliness to an already magnificent Earth. I tell you this as someone who has walked among tue giants of industry and the Forbes list and the addict beggar alike. Ive been forced into homelessness 5 times from giving other dominion over me, which i have already banished in the spells of the Papyrus of Nu.

Those true events are recorded and some will be released as writings with video, music, poetry, photography, AR experiences, 360 experience, sound healing with more research or collab with bubble ultrasound therapy to heal cells of Duggan's, and in research to re/generate them such as telomeres (tho there is much more to life extension, this is mentioned as an obviously valud and inspirational finding to myself. Try NAD+, Shiljit, Ashwaganda+GABA, DLPA, B12 for brain clarity. B1 can help if you're sick and need cell repair, otherwise my mind felt of a formless hangover, like a

blyepill to bring me up from lower bigrations, butblimiting me to freeing myself and remembering who IÂM.

The biggest unlock tho has been veganism for the past few days to clear out all the bugs from my meat tube. The food at Planta Cocona in MdR isnincredible meet that tastes of every succulent bite with consume ajdbeggplant sushi that tastes better than the being and a salmon watermelon one that is also somehow better than the most bougie sushi spots inLos Angeles, Toronto, NYC or London. I am exploring Japan soon.

Whether knensu.nu is a character or a prophecy is for you to determine as you as all the attributes or every attribute of you quon clears off its lens of all the gunk, ego, and any emotion below action, peace, serenity, tolerance, guidance, and duality in the singularity that is the QUOS.

Pronunciation: qu-ose, like cosmos

Listen to All healing tones (3D) by ñü.ŵævēš healing on ñü.ŵævēš [All healing tones \(3D\) · ñü.ŵævēš healing — ñü.ŵævēš](#)

A full nu.reality documentary has been in thebworks for 22 years, daring on experiences, adventures, madness, tragedy, resurrection, rebirth, sync, entropy, ressonance, and Ålignmènt.

Airgato 🙏, Elliott

P.S. mirrorå is my nickname for each quon (which are a more physicsy proper name). It you and its me and its that rock, the worm cut in 67 slices, each regrowing into its own thriving consciousness with its own life, experiences, emotions and triumphs.

We are are Square Zero as a species now. I had to do this alone.

Its time to go from 0 to 1. Think of Mirrorå 🌐 as a tech startup that has just openingbup to all who want to conteibute, and is oaying egeryone anyway for just opening an app or buying a phone case.

For business, company, foundation process, just use Agile Squads ffs. No exfeptions on my projects where i am source/architect/designer/jack(ass) of all trades lol

Im asking tor your help. Contributors will get validation and this theory may evolve into a real law, or be totally bullshit sativa pipe dream while rewatching the matrix films and reading the Hor Book of Breathings.

The indeeelying purpose is to see how magicsl we can make this dimension, and can we pass through them? And of course, what is beyond? Either way, these technologies have been developed by me over 22 years and much longer in the philopshy "duality within a singularity" meaning Oneness or God, and a God in You or even lil ole Elliott. This feeling has been with me since birth and i have died many deaths in this epicureal meat tube that is Elliott. My meat tube is not the ine trye Elliott, if such a thing could even exist, thi i feal that talj is inspiration but truly just rectum mouth vomit.

My feeling have remained true sinfe brith that love is rhebmesaage. Just dint fet stuck up on one girl. Or one thing. Orbme. Or this. Or that. Just live. Move to another continent , give the girl, be bad and bougie, be the father thebmorher ofbyour children needs. Support her. She is greater than any man, especially those entrapped in thebtoxic mysogeny and violence to limit women and children by acery real pareiarchy that needs to with get on the train of compassion, love, and forgiveness, but with no second chances after this and no amnesty for evil actions. To the Hague. 🧠 ⚡ 🧠 ⚡ 🧠 ⚡ 🧠

A football team can only win if the coach has effective/innovative plans. Tho the QB must act in the moment to find their open receiver which may differ from planned play, that why a coaches plans are never, only do action X or fail. That is a singular software unit test, not life. There is always xyz, and often xÿžăě blah blah blah. You get it now? If not, help me clarify to you. My DMs are open on khensu.nu, insta (khensu.nu), at wut@khensu.nu, or on the Åstral plane if im not otherwise occupied.

BE. has been with me since birth, or before for thise who believe in reincarnates.

Deeper research needed (notes):

Quantum physics vs string theory vs music theory vs mirror dimension theory vs pocket dimension theory vs infinite memory, speed, power, mass, velocity, time, each as separate dimensions that are infinitesimally exponential inwards and outwards. Each dimension is the same generic data type. So everything is everything. Every who/what/where/when/why across dimensions at once, in one singularity.

Everything isbliterally eferything seen from differenet vantage points with differwnt eestrictionsbon. We are not replucas, we are deep links to the same app. That singular QUON. Not q anon lol, fuck those peeps. Thisbisbbased on real physics and scientific rigornisbrequestedbif other aouldbdeem

what i call Mirror Ä Law, or perhaps Mirror Ä Theory for now.

This is distinct from legacy theories like string theory (mere dust on your lens).

This is an extension of quantum physics, built on the backs of giants.

Each quon is you and you are each. You cannot destroy others, but can destroy other versions of yourself in your quon that is by your own consciousness. Humans can't see all dimensions, hell they can't even see all colours; compare~ mantis shrimp eye cones count and octopus and goats. These are our shepherds and protectors. We must embrace veganism and rid ourselves of bugs to achieve enlightenment. Mental ego and self importance must be eliminated.
